Specification

Rated voltage and rated frequency		100-130V~ 50/60Hz	
Water effluent temperature		About 89.6°F~107.6°F	
Drying temperature control (Some models do not have this function)		About 89.6°F~134.6°F	
Seat surface temperature		Room temperature~About 105.8°F	
Upper seat closing way		soft close	
Rated power	1260W	Max power	≤1800W
Supply water temperature	39.2°F~95°F	environment temperature	37.4°F~104°F
Water proof level	IPX4	Product size	513*396*103mm
Supply water pressure	0.07MPa (dynamic pressure) ~0.75MPa (static pressure)		

※1: The rated power: water pressure is 0.18MPa + 0.02MPa under the ambient temperature of 73.4°F±35.6°F, And under the condition of 59°F±32.9°F water-inflow temperature, heighten the water quantity, the seat temperature and the water temperature in turn, to stat the posterior cleaning (2 minutes) in a average power.

※2: Maximum power: water pressure is 0.18MPa+0.02MPa under the ambient temperature of 73.4°F±35.6°F, And under the condition of 41°F±33.8°F water-inflow theperature, heighten the water quantity, the seat temperature and the water temperature in turn, to start the feminine cleaning (2 minutes) in a average power.

Parts name

Knob and button functions instructions

Electricity on

Rear wash: when sit on the seat, rotate the knob back to rear washing area to turn on the rear washing function, rotate inside the rear washing area to control the water volume, press shortly the left side button "+" / "-" to adjust water temperature, total 3 levels.

Front wash: when sit on the seat, rotate the knob forward to front washing area to turn on the front washing function, rotate inside the front washing area to control the water volume, press shortly the left side button "+" / "-" to adjust water temperature, total 3 levels.

Turn off: rotate the knob to turn off position to stop rear washing/front washing.

Drying: when sit on the seat, press 3 seconds the left side button "-." to turn on the drying function, then press shortly the left side button "+" / "-" to adjust air temperature, total 3 levels. And then press 3 seconds again the left side button "-." to turn off the drying function (Some models do not have this function).

Seat heating: under non-washing/non-drying condition, press button "+" / "-" to adjust seat temperature, total 4 levels (including heating turn off).

- ※ If people leave the seat under the rear washing/front washing condition (there is no buzzing alarming function under the electricity off condition), nozzle will continue to spray water to toilet pan until people rotate it to middle position, and product will be back to regular.

Product installation

【Tips】

- 1、Put expansion nuts into installation holes;
- 2、Put fast-install baseboard on installation holes;
- 3、Put adjustable sliding vane on fast-install baseboard;
- 4、Fix adjustable sliding vane and baseboard to ceramic body through expansion screws.

Fast-install button

Put the cover seats in direction of fast-install baseboard, and push cover seats as the arrow shown. cover seat is installed after sounded.

※ Tips for installation of fast baseboard

- 1、Install the baseboard and cover seat ont fully tightened and adjust the position.
- 2、Take out the cover seat after press the button again.
- 3、Fix the baseboard, then install the cover seat.

Assembly of inlet hose and filter

- ① Screw the Water Inlet Hose into the water inlet of the product.

- ② If the Water Inlet Hose needs to be removed, please remove by rotating the connector in the direction of the arrow shown above, counter-clockwise.

- ③ Rotate the filter screen counter-clockwise to remove from the eBidet. Use clean water or a damp rag to clean the filter screen.

- ④ To install the filter screen, rotate the filter screen clockwise into the eBidet.

Water supplied by connecting products

Method 1:

1. Connect the T-Valve Adapter to existing water supply shut off.
2. Connect the Water Inlet Hose to the T-Valve Adapter.
3. Connect existing toilet supply line to the top of the T-Valve Adapter.
4. Connect the other end of the Water Inlet Hose to the eBidet.

Method 2:

1. Attach the water supply hose to the bottom of the T-Shaped Connector.
2. Connect Water Inlet Hose to the side outlet of the T-Shaped Connector.
3. Attach the T-Shaped Connector to the water tank where you removed the water supply hose.
4. Connect the other side of the Water Inlet Hose to the eBidet.

※ WARM PROMPT

The products has been test by water, and it is normal if dropping out little amount of water when taking out products.

※ After finish installation, turn on the inflow valve to make sure that the seat sensor is sensible, and then press each button to check if the toilet is worked after sitting induction is ok.

Cleaning

① Close the water-inflow valve.

② Pull the plug and then unscrew the hose.

③ Press the quick installation button and take off the seat cover.

④ Wipe the seat cover with a sponge or a smooth cloth dipped in soapy water or neutral detergent.

⑤ Install the seat cover.

Nozzle washing

① Under the non-working condition, pull out separately the nozzle rod from rear washing and front washing, and then take off the nozzle from nozzle rod

② Use toothbrush, sponge or smooth rag with soap water or neutral detergent to clean nozzle and hose

③ Pull out separately again the nozzle rod from rear washing and front washing, and then assemble the nozzle to nozzle rod

※Warming reminder

Please do not use non neutral detergent like hydrogen chloride, diluting agent, insecticide, sand paper or rough rag to clean.

Common troubles and shooting

Phenomenon	Reasons	Measures
product cannot work normally	check if electric line insert well or if the electricity leakage protector is off	electrify
➤ rear washing ➤ front washing not reaction after pressing the button function of rear washing or front washing or drying.	nozzle do not run out;	check if no water supply, if so, rotate the knob to off and wait until it is re-starting the water supply
	nozzle run out but no water spray, or with little water spray	Do not rotate the knob into correct position
		If the inlet valve is under the off condition, if so, please turn it on
		If the inlet valve filter is block, if so, please clean the filter or replace one
	water temperature set-up is relative low	use side button to adjust the washing water temperature
nozzle washing suddenly stop	when sitting on the seat, the sensor do not sense	sensor might not detect someone is on seat, please sit on the seat following the correct way
	user might move too fast or leave the seat, the sensor can not detect if the user is on the seat in short time	user re-sit on the seat and need to set on the sensor area, then re-press the button of rear washing or front washing to start the washing.
the water pressure of rear washing or front washing is low	the filter might be block	clean or replace the filter
	inlet water hose might have water leakage	check the inlet water hose, to screw the inlet water hose fixing screw firmly
The whole product alarm and water come out by it self	When people leave the seat, the knob might not be rotate to off	rotate the knob to off

Maintenance Service Sheet
